

```
[11:50:23] [Spigot Watchdog Thread/ERROR]: -----
[11:50:23] [Spigot Watchdog Thread/ERROR]: The server has stopped
responding! This is (probably) not a Spigot bug.
[11:50:23] [Spigot Watchdog Thread/ERROR]: If you see a plugin in the
Server thread dump below, then please report it to that author
[11:50:23] [Spigot Watchdog Thread/ERROR]: *Especially* if it looks like
HTTP or MySQL operations are occurring
[11:50:23] [Spigot Watchdog Thread/ERROR]: If you see a world save or
edit, then it means you did far more than your server can handle at once
[11:50:23] [Spigot Watchdog Thread/ERROR]: If this is the case, consider
increasing timeout-time in spigot.yml but note that this will replace the
crash with LARGE lag spikes
[11:50:23] [Spigot Watchdog Thread/ERROR]: If you are unsure or still
think this is a Spigot bug, please report to https://www.spigotmc.org/
[11:50:23] [Spigot Watchdog Thread/ERROR]: Be sure to include ALL
relevant console errors and Minecraft crash reports
[11:50:23] [Spigot Watchdog Thread/ERROR]: Spigot version: git-Spigot-
800b93f-8160e29 (MC: 1.15.2)
[11:50:23] [Spigot Watchdog Thread/ERROR]: -----
[11:50:23] [Spigot Watchdog Thread/ERROR]: Server thread dump (Look for
plugins here before reporting to Spigot!):
